

## INTRODUCTION

Lean Tools help to excel the growth of a company. Proficiency in practicing lean tools enables effective implementation of lean approach. Value Stream Mapping (VSM) is an important tool for lean transformation. VSM monitors & controls the Value Added & Non Value Added activities and helps in productivity improvement. It provides graphical view of the entire operation in the industry, right from procurement to dispatch. It helps visualizing the scope for making improvements.

## FOCUS AREAS

- Basic Lean Concepts
- Drawing the current state map- indicating cycle time, Lead time, Manpower of an operation
- Drawing the future state map- showing Kan-Ban, Kaizen Bursts, Supermarket
- Adding the resources and describing NVA
- Implementation
- Case studies
- Comprehension test and discussions\*

\*Participants can bring their real life problems and the relevant data during the workshop. The discussions will be held on this during the 2nd half of the workshop.

## KEY TAKE AWAYS

- How to prepare a Graphical outline map of production place, which will help in- Planning, scheduling, implementing kaizen and effective discussion during meetings.
- Understand the different aspects and possible varieties of VSM
- Role-play the strategies and counter the barriers.
- Review the hidden potential into the self and propagate the ideas and concepts.
